IT Manager & Full Stack Web Developer

I am a software developer and an IT Manager with more than 10 years in programming and 7 years already in building and managing IT infrastructure for an International lab.

As a software developer, I use my skill to create applications that help improve business processes according to users requirement. I have wide knowledge and experience in ICT. I make use of my experience to reengineer processes and improve it to make the business effective and efficient by *planning, designing, implementing and maintaining IT Solutions.*

I am well versed in converting the requirements into effective business design. Having knowledge and experience in software companies, I use my knowledge in the process of detailed system design and Technology Integration.

Objective:

Am looking for an opportunity to still grow and become expert in using IT solution to implement projects that affect the life of many people positively.

Professional summary:

- **10 + years of experience in analysis, design and development of client/server, web based and n-tier application. Expert in developing windows applications, web applications, in Microsoft Visual Studio .Net IDE using VB.Net 1.1, VB.Net 2.0, VB.NET,ASP.NET, SQL Server or PHP and MySQL.**
- **Angular Js, Node Js, Ionic Framework for Web and Mobile app development**
- **SCRUM, Agile Software Development, Software Project Management, Business Model design**
- Strong Proficient in Web Development using OOP, PHP, Mysql, XML, HTML, CSS and JavaScript.
- Frameworks: .NET Framework 2.0 and 3.0, Laravel framework (PHP) 4.1, 5.6
- Worked with SQL Server Database design, Database maintenance, developing T-SQL queries, stored procedures, and triggers using SQL Server 2000.
- Fair Knowledge of UML for class and Use Case design
- Expert in debugging an application using the debugging tools provided by the Visual Studio .Net IDE.
- Effective in working independently and collaboratively in teams.
- Computer repair & Maintenance
- Network Installation & administration
- Knowledge and familiarity with structured programming.
- Able to estimate all phases of the software development life cycle from requirements definition through software maintenance. Working familiarity with Higher Order languages such as VB.net, PHP

Other Highlights:

- Strong ability to learn new things and adapt easily.
- **Strong troubleshooting and problem-solving skills.**
- **Multi-task with strong organizational skills.**
- Work effectively independently or as a team player
- Creative and Innovative with ability to Plan, Budget, Design and implement and Maintain IT solution towards the company's growth and vision.
- Can Speak three languages : **English** , **French** :fluently and **Italian** Beginner's level
